#### Specification

Applicant is asked to insert the missing data missing on page 1 of the specification.

#### Double Patenting

Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 09/817,353 in view of Roman et al and Haseltine '143. Roman et al. and Haseline disclose obvious variants of the elements recited in claims 1-16

This is a <u>provisional</u> obviousness-type double patenting rejection.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6,10-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Roman et al.

Roman et al. disclose a method of using the Internet to provide return labels to customers for facilitating returns of merchandise, comprising the steps of: receiving, from a customer, a request to initiate return processing (customer clicks on RETURN), via a web access tool associated with the customer (access tool is read as the

Application/Control Number: 10/751,216

Art Unit: 3627

computer on which the consumer is using and hence it is associated with him);

Page 3

displaying to the customer, here the consumer, return information at the web access

tool (pp0019 "the system provides instructions for return shipping); receiving return-

related data from the customer, via the web access tool (pp0015 clickreturns.com

receives information from customer regarding receipt number etc.), thereby identifying a

return item; and generating data for printing a return label (pp0020 consumer prints a

packing slip). Regarding the limitations of a list of one transaction and return related

data being elected from the list, applicant is directed to Roman et al. paragraph 0017

which explicitly states the display offers replacement or exchange. This display of two

options for returns is read as a list. WEBSTER'S COLLEGIATE DICTUIONARY TENTH

EDITION defines a list, inter allia, as:

3. *n* the total number to be considered or included; *v*. ENUMERATE

Clearly the display in Roma et al. lists the options of "replacement or exchange" and the

user responds by choosing one of these as the selection from the list.

Claim 2, wherein the displaying step is performed by displaying a return information web

page (page of click return.com is read as a web page).

Claim 3,4 official notice is taken regarding the old and notorious practice of generating a

confirmation of a transaction on a separate page. See e.g., US6497408 par. 64

Application/Control Number: 10/751,216

Art Unit: 3627

Claim 5: accessing a database to obtain customer information about the customer (see

pp 0016 line 3), and wherein the displaying step includes displaying at least part of the

customer information (the offered replacement product is read as part of customer

information since it will reference the initial product).

Claim 6: accessing a database to obtain customer transaction information (see pp0016

line 3), and wherein the displaying step includes displaying at least part of the

transaction information (the offered replacement product is read as transaction

information since it will reference the initial purchased product).

Re claim 10/11: performed prior to the downloading step, of determining whether the

return is valid (see pp 0016 line 2 submitted return is analyzed for fraud against a

database). Official notice is taken regarding the giving of notice that the request has

been rejected. See e.g. US6192347 par. 517

Claim 12: see pp 0016 e-tailer establish parameter e.g. rules to determining whether

the return is valid.

Claims: 13/14/16: a merchant is notified of the return item (information about the

customer is that he is returning the product undamaged) by the processing center

pp0022 line 8).

Page 4

Claim 15: pp0020 consumer prints a packing slip which obviously includes the

step of downloading the data for printing a return label to the web access tool.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 7,8, are rejected under 35 U.S.C. 103(a) as being unpatentable over Roman et al. in view of Haseltine '143. Roman et al. appears to be silent regarding a database dedicated to merchant return rules. However, Haseltine does disclose merchant specific rules for returning products which are in a database tied to the packing slip identifier. It would be obvious to modify the method of Roman et al. to include the merchant specific return rules, the motivation being the ability to accommodate different business practices.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's arguments filed 11/9/05 have been fully considered but they are not persuasive. Applicant argues no disclosure in the art of displaying from a list return information. The examiner reads Roman et al. differently. Roman et al. paragraph 0017 explicitly states the display offers replacement or exchange choices. This display of two

Page 5

Application/Control Number: 10/751,216

Art Unit: 3627

options for returns is read as a list. WEBSTER'S COLLEGIATE DICTUIONARY TENTH EDITION defines a list, inter allia, as:

Page 6

3. *n* the total number to be considered or included; *v*. ENUMERATE

Clearly the display in Roma et al. lists the options of "replacement or exchange" and the user responds by choosing one of these as the selection from the list.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (571) 272-6780.
